

Quantum Architecture

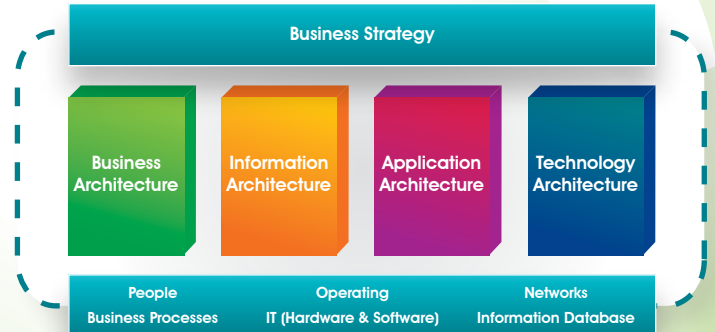

A comprehensive **integration framework** that assists organizations to understand their own structures and processes, and how they work.

- Multi-Source, single repository architectural map
- Data collaboration modeling
- Pre-configured system and process models
- Embedded role-based Enterprise Performance Management, reporting, measurement

In creating an architected solution for your business, SYSPRO selects the components that best match your business needs, and because this is an architected solution, it encompasses both your current and future needs.

SYSPRO Quantum Architecture incorporates four different dimensions:

Based on industry standards and combined with leading technologies, the SYSPRO architects create the SYSPRO Solution Architecture that both enables and supports the various dimensions and needs of your business.

The Value

of SYSPRO Quantum Architecture
